◆ Summary

Ambitious IT graduate with a solid foundation in software development, data science, and cloud technologies. Eager to contribute to IT infrastructure, network security, and modern cloud-based solutions using cutting-edge tools and platforms.

◆ Skills

Technical: Linux, Python, Cloud Computing, AWS (CLI, Lambda, RDS, Auto Scaling), Firebase, C/C++, SQL, HTML, CSS, PHP, WordPress

Tools: AWS SageMaker, Amazon DynamoDB, AWS API Gateway, Firebase Firestore, Firebase Auth, MS Office

Languages: English, Kannada, Hindi

◆ Education

Master of Computer Applications

Jain Online · 2024 – Present

Bachelor of Computer Application

BMS College of Commerce and Management · 2020 – 2023

CGPA: 7.7

◆ Work Experience

App Developer Intern

Bhupati Techno Solutions · Feb 2025 – Present - Assisted in designing and developing mobile applications. - Wrote clean, maintainable code and debugged technical issues. - Participated in code reviews and collaborated during team meetings. - Supported application updates and created technical documentation.

Software Sales Executive

A.i Kaizen Pvt Ltd · Jan 2024 – Oct 2024 - Engaged with potential clients to identify and analyze business needs. - Presented and demonstrated custom software solutions. - Supported deployment of centralized management systems to enhance operational efficiency.

◆ Projects

ChatBot using AWS

Developed a DevSecOps-focused chatbot using Amazon Kendra for enterprise search, Amazon Bedrock for conversational AI, and AWS SageMaker for machine learning. The chatbot was trained on documents stored in S3, enabling accurate DevSecOps-related responses.

Skills: AWS Kendra, AWS SageMaker, Amazon Bedrock, Amazon S3

Dynamic WordPress Website Hosting Using AWS

Designed a scalable and secure WordPress hosting solution leveraging RDS for database management, Load Balancers for traffic distribution, and Auto Scaling for high availability and performance.

Skills: AWS, RDS, Auto Scaling, Load Balancers

Serverless Text-to-Speech Website

Created a scalable text-to-speech system using AWS Lambda, DynamoDB, S3, and API Gateway, ensuring seamless and cost-effective functionality.

Skills: AWS Lambda, DynamoDB, S3, API Gateway

Duckey Bird – A Python Game

Replica of the Flappy Bird game developed using Python (pygame) with three game modes and characters. Built as part of a final-year academic project at BMSCCM.

Skills: Python, pygame

NGO Website

Built a full-stack donation website to support NGO funding. Frontend used HTML and CSS; backend was developed with PHP and MySQL. Created during the 5th semester of BCA at BMSCCM.

Skills: HTML, CSS, PHP, SQL

Easy Ride – Cab Booking App *(In Progress)*

Developing a Flutter-based ride-booking application using Firebase as the backend. The app features real-time ride tracking, driver/rider authentication, trip history, and dynamic pricing using Firestore, Firebase Authentication, and Firebase Cloud Functions.

Skills: Flutter, Firebase, Firestore, Firebase Auth, Firebase Cloud Functions

◆ Certifications

- **AWS Certified Cloud Practitioner**
 - **AWS re/Start Graduate**
 - **AWS Cloud Quest: Cloud Practitioner**
